

Quality Policy of Elettrotec

Milan, September 24th, 2025

The Management of Elettrotec has established, adopted and disseminated the Quality Policy in a documented manner at every level of the Organization and to all interested parties.

Elettrotec intends to pursue these objectives through the management model indicated by the UNI EN ISO 9001:2015 standard.

Elettrotec is constantly committed to achieving, increasing and verifying customer and stakeholder satisfaction, to the systematic monitoring of company costs, with the awareness that the primary goal of the company is to work in an organized way in order to profit from what has been achieved.

Elettrotec uses a “risk-based thinking” approach for the management of its ordinary activities and for the maintenance/growth of its market position. It is a priority of the Company to maintain a workplace in compliance with the current legislation (Legislative Decree 81 – 2008) on Health and Safety.

Corporate sustainability is now synonymous with growth and success; for this reason Elettrotec is implementing new strategies capable of simultaneously achieving sustainability in the environmental, social and economic spheres. Through appropriate changes to its production setup and air conditioning system, Elettrotec has reduced its environmental impact.

Elettrotec intends to involve its staff in the company's growth, allowing them to actively contribute to process improvement and to the development of its business in a sustainable way, complying with mandatory regulations and paying particular attention to the environment.

Management has identified and assigned, for processes considered critical, certain indicators with related objectives in order to monitor and measure company performance and evaluate the achievement of goals set during Management Review. This activity is aimed at customer satisfaction and the continuous improvement of the quality management system.

Management also undertakes to provide all necessary resources for the implementation of what has been defined, to formalize and clearly disseminate the content and spirit of the Corporate Policy, supporting and improving it through a periodic review of the Management System.

Managing Director

Dr. Adriana Silvia Sartor
